Miners Down St. Louis U. 34-28 for 4th Cage Win

Keith Cook Stars in Hard-fought Rough and Tumble Battle

By Ed Vogelsang

With Keith Cook piling up sixteen points, the Miners triumphed over the Blue and White aggregation from St. Louis here last night by the score of 34 to 28. The Miners led throughout the game which was filled with rough play and furnished plenty of excitement for the packed gymnasium.

Schroeder opened this wide-open affair sinking one from mid-floor. Captain Wampler added another, then St. Louis got in gear with Bandle making a set-up to make the score read 6 to 2. After five minutes of play the score was changed slightly as St. Louis added another point by the free throw route.

A nip and tuck battle followed with the Miner's score slowly dwindling away until Bruce added two goals with his pivot shots under the basket, but McCarthy, St. Louis forward, sank a long one. Cook, who entered late in the game, dropped one in from mid-floor, and the half ended with the Miners leading 13 to 9.

The second half was entirely a Cook field day. Fourteen of Cook's points were scored in the second half, when he sank one while lying on his back. With Bruce and Wampler grabbing them off the backboard, play concentrated near the Miner net. McCarthy and Stertz, both of St. Louis, kept the Miner quintet in check. With seven minutes left in the last half, the score was 24 to 21 in favor of Rolla. The Miners put on the heat and after two more "buckets" by Cook they eased up slightly. Barry of

Dyer to Address ASCE Tonight

G. H. Dyer of the Springfield City Water Company of Springfield, Missouri will present a lecture illustrated with slides to the student chapter of the American Society of Civil Engineers tonight. His talk will concern the construction and operation of the water-works of Springfield. This meeting will be held at Harris Hall at 7:30. All are invited.

ASM to Show "Making And Shaping of Steel"

"The Making and Shaping of Steel," a sound motion picture will be shown in Parker Hall on Wednesday evening, December 18th at 7:30 under the auspices of the student chapter of the American Society for metals.

The picture depicts the complete story of the manufacturing of steel products from the mining of the ore to the completion of the finished products. It shows steel being made into bars, wheels, rails, pipes, and tubes—the making of steel products of all shapes and forms.

A complete Hollywood crew was in charge of the making of this film to make sure that the story of steel was told in an interesting manner.

Actors Are Men Who Make Steel

The actors in this film are men who actually make steel. Men whose whole life is steel went on with their work while the cameras caught the story. No professional actors are used in any portion of the picture. This is the actual story of steel.

This film was made in the manufacturing plants of subsidiary companies of the United States Steel Corporation and is being shown here through the courtesy of that company.

Students faculty, and the general public are invited to attend the showing of this interesting and informative picture.

R.C.A. And Westinghouse Will Interview Seniors

Westinghouse To Select Men From 5 Departments

On Friday, Dec. 20, 1940, Mr. L. W. McLeod, Central Station Manager, Southwestern district, Mr. I. T. Monseth, Engineering Manager, Southwestern district, and Mr. R. P. Meily, of the technical employment and training office of the Westinghouse Electric and Manufacturing Company, will interview seniors and graduate students in electrical, mechanical, metallurgical, and chemical engineering.

Student Training Course

Previously, Westinghouse has conducted a graduate student course in affiliation with the University of Pittsburgh, New York U., Polytechnic institute of Brooklyn, and Steven's Institute of Technology, in which the men selected for employment are given further training. This training consists of an academic course conducted in conjunction with shop work. The academic work may be planned so that the student may obtain a master's degree in three years.

In years before, it has been the custom of the company to assign a student to several different departments so as to determine the type of work for which he is best qualified. It is expected that this plan may be revised somewhat, because of the demand for shop

See WESTINGHOUSE, Page 5

RCA Holds Openings for Mechanicals, Electricals, And Physicists

The Radio Corporation of America will send Mr. C. F. Johnson, Asst. Director of Training Courses to the M. S. M. campus on Thursday, Dec. 19, 1940 to interview February and June graduates, and post-graduate students for positions in the company's National Defense Expansion program. Although this initial mid-year employment program was necessary because of the expansion program, the jobs are not regarded as temporary. It is believed that the National Defense program will continue for at least four years.

Company Operates in Many Fields

This company offers perhaps the greatest diversification of employment of any company interviewing on the campus. Among the varied fields of industry listed by them are: mechanical design and development; production control, production planning, materials control, production supervision, foremanship, design and development of transmitters and receivers, audio frequency equipment, cost analysis, cost estimating, cost control, motion economy, work simplification, shop practice, industrial economics, and practical research in audio frequency, radio frequency and electronics theory and devices.

15-Minute Interviews

The interviews will be preceded by a half-hour talk outlining the organization of the corporation, its training courses, conditions applicable to registrants for these courses, and the opportunities in the company upon completion of the courses. Following the talk, 15 minute interviews will be granted those men qualified for the positions.

To The Presidents of all Campus Organizations

If an Engineers Day is to be held here at the School of Mines next spring, work on it must be started months ahead of time. A decision as to whether or not this event will be held must soon be made by the faculty committee recently appointed by Director Chedsey, and their decision will be greatly influenced by the attitude of the students on the matter.

Since most of the work on Engineers Day, such as operating exhibits, guiding visitors over the campus, and the like, must be done by student organizations, an expression at this time from the various campus organizations of their willingness to co-operate would greatly increase the likelihood of an Engineers Day.

As the leaders of our campus, an expression from you on the part of your organization would give the faculty committee a definite indication of the wholehearted support of the student body.

The chairman of the committee is R. O. Jackson, and the members are I. H. Lovett, C. V. Mann, W. E. Yates, and G. W. Noble. Don't fail to see one of them this week and to offer your cooperation.

Don F. Pealer, ex '29, has been employed as the Chief Clerk for Mr. Dunn, Assistant Project Engineer, for the Decatur Construction Company in the erection of the Seventh Corps Area Training Center near Rolla. He will have headquarters at Alhambra Grotto near Newburg.

Andrew J. Seltzer, class of 1907, is stationed at Los Angeles, California, where he is associated in business with the R. A. Perez Company, Assayers, Engineers, Metallurgists. His business address is 120 North Main

Street.

Charles L. (Bud) Clayton, member of the class of 1938, was in Rolla last week-end en route to Chicago, Cleveland, and Pittsburgh, to visit plants of the United States Steel Corporation. After his trip east he will return to Rolla to spend the Christmas vacation with his parents, Prof. and Mrs. Charles Y. Clayton. Bud is connected with the Columbia Steel Company and has been working at their headquarters in San Francisco, California.

Mr. and Mrs. J. R. McCarron announced the birth of a baby boy, John Robert, on December 7, 1940. Russ is with the Vanadium-Alloys Steel Company in Philadelphia, Pennsylvania.

The Michigan Wolverine, with 950 members, is said to be the largest student cooperative in the world.

In The Mail

Dear Editor:

The Alpha Psi Omega annual production is the only time the Miners get to really express their feelings and the only time they really get a chance to turn their wit, such as it is, loose.

I don't know why, but somebody seems to have the idea that we must reform the school. Everything that the student body has done heretofore is wrong and must be changed now.

First, we cut down the hazing of Freshmen. Now we have a bunch of Freshmen who refuse to do anything that all previous classes have done.

Then we have the authorities down on us for taking a mass cut and ringing the traditional victory bell.

Now we are confronted with threats to discontinue General Lecture programs just because the student body spontaneously decided to have a good time at a program given by the student body for the student body.

In a recent issue of the Miner C. E. Z. expressed in an editorial his belief that nine out of every ten Miners would rather watch the program than have fun sailing airplanes and heckling the actors. It seems rather strange that nine out of every ten fellows could not have thrown out the remaining one.

C. E. Z. also stated, "just for variety sake, let's all try to save our applause for the right spots." I wish to reply, "for variety sake let's all let ourselves go, and say whatever we get an urge to say." We can go to a play or show to enjoy the script and acting any day of the week, but when or where else can we really express our feelings and have as much fun as the actors.

Wouldn't it be possible, hereafter, for the Alpha Psi Omega to present their play thrice instead of twice. Once for the general public, once for the Miners with all paper planes and heckling barred. Last but not least, once for the Miners with paper airplanes, mills, jibbing and all. With such an arrangement any one who went for the play and the play only will be satisfied, their lady friends will not be embarrassed and the so-called "rowdies" will not have to worry about annoying the man in the front row with the top hat and white gloves.

Sincerely,
Waldemar M. Dressel

To Ye Ed:

Let's quit trying to put on the dog!

I went to my last dance on November 29, 1940.

From now on, I'll take in the Saturday night wild west, or sit around Harveys. That is, unless I can possibly persuade the folks into buying a tux this Christmas.

Couldn't we all have as good a time, a much cheaper time, and be well dressed enough without the tux?

Another view point is that of past college days. Ask the grads how many times they've worn their tux since graduation.

(Signed) One of many without a tux.

Splashes of Ink

By The Pen of Ye Ed

HERMANN BOTTCHE, the hero of the Alpha Psi Omega play last Thursday, is worried. Hoiman is engaged to a young lady in his home town, and, due to the super-sales circulation drive of the MINER, several MINERS reach his home town every week. Last week the MINER said in the play writeup that Hoiman 'kissed' more girls than anyone else in the play, and that rehearsals took place for 6 weeks. We'll fix you up, Hoiman.

GLENN JARVIS, who Hoiman kissed more than anyone else, said in an exclusive interview with Ye Ed that Hoiman steadfastly refrained from any osculatory rehearsals, and that when Hoiman really kissed her the night of the play, it was such a surprise that it took her breath away.

RUMOR HAS IT that the Missouri School of Mines is on the blacklist of Stephens College. In order for a Stephens girl to attend a dance here, she must come down in a taxi with a chaperon, and must go back a half hour after the dance is over.

HAVE YOU TAKEN the Purity Test? Be sure to do so. There are various forms of it floating over the campus. They begin with questions such as "Do you smoke?" "Do you curse?" and so on down the vilest acts of immorality and perversion.

APPLICATION PHOTOS 1000 for five dollars! We'll take your picture and print it in the MINER, then you can cut out your picture from all your friends MINERS. Of course, no one will be able to recognize you, but think of it, 1000 for \$5.

Off the Campus

Sigma Pi's Winter Formal Held Friday

In keeping with the Yuletide spirit, as exemplified by the decorations in the town of Rolla, Sigma Pi of the Missouri School of Mines gave its Winter Formal last Friday, Dec. 13th, against a background of cedar boughs and ornamental lights at their home on Highway 66.

Music was furnished by the Varsity Orchestra for the occasion which was attended by numerous out-of-town guests and members of the faculty.

The chaperones for this affair were Dr. and Mrs. W. T. Schrenk, Dr. and Mrs. T. G. Day, Prof. and Mrs. R. M. Mains, and Prof. and Mrs. W. E. Yates.

Theta Kappa Phi is pleased to announce its two most recent pledges, Joe LaBarge and Bill Thomas, both of '44. Joe Dusza and Bud Haas have already received their selective service blanks for the compulsory military training. Bob Dorsey was one of the ten applicants who successfully passed the physical examination for entrance into the Army Air Corps. Bob will no doubt begin his flight training in June. Theo. Holy merited a letter for his work on the gridiron this fall.

Bob Kloner, Peter Des Jardins, Bud Haas, and Bob Dorsey are going to Lindenwood Saturday to attend a dance given by the Senior class with the music of Harry James.

Student Council Plans For Who's Who Selection

To solve the annual problem of choosing men for the annual edition of Who's Who in American Colleges, the Student Council recently decided on the following plan, which will be put into effect next fall.

The personnel records of seniors which are kept in the Registrar's office will be examined and points credited to each man for his various activities. Then the names of the ten men with the highest number of points along with their activities will be sent to the publishers of Who's Who.

The request for the names this year came on too short notice for action to be taken, therefore, the next issue of Who's Who in American Colleges will not contain any of the MSM seniors.

The plan was decided upon as a fair way of selecting men for the publication, since the method of past selection had received much unfavorable criticism.

To the local girls who wrote the letter to the Editor: We're sorry, but we can't print anonymous letters. If you will just call us up and tell us that you wrote the letter, we will gladly print it and keep your names secret. Otherwise we cannot be sure that the letter is not really written by a prankster.

What did the mountain ram say as he plunged over the cliff?
Ans: I didn't see that U-turn.

Miner Five To Invade Cape For First MIAA Game

Thursday, December 19, the Miners will oppose the Cape Girardeau Indians at Cape Girardeau. This game will be the opener of conference play in the MIAA circuit for both quintets.

Both teams have engaged in a number of non-conference tilts and should be all tuned up for this get together. Coach C. O. Harris and his fourteen members of the Teacher College Indians basketball squad have been touring the country during the past few weeks. They have met the Evansville College Purple Aces, the West Kentucky Teachers of Bowling Green, and the Murray Teachers of Murray, Kentucky. Saturday at Bowling Green, the Westerners defeated the Indians 42 to 23.

Coach Gill's team of this year surpasses any of the Miner squads of the last few years and opponents will no longer consider the Miner tilts a "breather" in this conference. The Miners have increased considerably in height, which is a very important factor when opposing such teams as Warrensburg, Maryville, and several of the other tall squads. The Miner squad has also improved in its scoring ability. Bruce seems to be better than last year. Schroeder will be pressing Bruce in high scoring honors as the season continues. Captain Wampler is always good for his show of points, and with Nesley sinking those long ones, the Miners should make it considerably tougher for the teachers' colleges.

Cape Girardeau is expected to depend on Herbert Mulkey, Gene Hill, Jack Behrens, Bud Burns, Roscoe Branch, and Carroll Gunnett.

Swimming Team to Meet Washington U. Squad Dec. 19

The MSM Swimming team will open their 1940 season with an exhibition meet with Washington University on the 19th of December. The meet will be held here at Rolla. After this exhibition meet, the Miners will have no further meets until the 25th of January when they journey to Jefferson City Junior College team. Twelve of last year's squad are back, and ten of the returning members of the squad are lettermen. The veterans are as follows:

Andy Cochran (Capt.) Cochran is a three year man and competes in the backstroke.

Ralph Brouk—a transfer from Illinois—broke the breaststroke record at MSM last year.

Theo. Hadley—Hadley is in his second year of competition. He holds the 100 yd. record for the backstroke. Letterman.

Dick Brackett — Brackett is one of the more outstanding members of the squad. His excellent work in the free style events last season have marked him as a coming star. Letterman.

Joe Berndt — Free style. Letterman.

Kent Comman — Free style.

C. Morris — Free style.

Earl Bierman — Free style. Letterman.

Divers: Sid Burberry and Fred Hancock — Hancock placed first in every meet last year except one, and in that meet he lost to Burberry.

Again this year as in several past seasons, the Miners will be coached by Louis P. Silverman. Silverman, a graduate of Warrensburg Teachers College, hails from Kansas City. "Louie" as he is more familiarly known, has done a great job with the Miner swimming team. Some years ago, Silverman competed in various long distance swims which were held near Kansas City.

The Schedule

December 19, Thursday, 5:30—Washington University, here.

January 25, Saturday, 2:30—Jefferson City, there.

January 26, Sunday—Kansas City (Kansas City Athletic Club) there.

February 5, Wednesday, 4:30—Westminster, here.

February 12, Wednesday, 4:30—Kemper, here.

February 18, Tuesday, 4:30—Murray State Teachers, here.

February 25, Tuesday, 3:30—Westminster, there.

February 28, Friday—Murray State Teachers, there (Murray Kentucky).

Round The MIAA

By Ed Goettmann

With no league games as yet played, it is still too early to accurately size up the respective teams. Most of the teams will begin their league play this week, with the Miners and Cape starting it off Thursday night. The Indians will present a strong aggregation led by a number of last year's lettermen, although they were routed Friday night by Western Kentucky Teachers 42 to 23.

The Warrensburg Mules were on the short end of a 40 to 31 score in their game with Pittsburg, Kansas Teachers Monday night. Bob Martin, a six foot four sophomore, paced the Mules attack with eleven points. Warrensburg again bit the dust Saturday night when the Southwestern five of Kansas nudged them 33 to 31. Kirkville Teachers eeked out a victory over Dubuque of Iowa, Friday night by the score 30 to 26.

Drake's basketball team registered its first victory of the season when it whipped the highly rated Maryville Teachers 31 to 22 Saturday night. Don Johnson, A Bearcat guard, lead the teachers attack with six points.

The Miners have gotten off to a flying start, owning victories over Central Wesleyan, Arkansas State, and Westminster and suffering their lone setback at the hands of Washington.

Half of Chemistry Building To Be Completed Soon

The north half of the new building which will house the Department of Chemistry and Chemical Engineering is nearing completion. The contracts for the hoods and tables have been awarded, the former to Leonard Peterson and Company of Chicago and the later to the A. S. Aloe Company of St. Louis.

The building will be turned over to the School of Mines sometime in February. The department of Chemical Engineering and the Organic Processing department will move in immediately following that time. Part of the Quantitative Analysis or Freshman Laboratory may be moved also.

The other half of the building will be open for construction bids as soon as the funds are available. The entire building will be erected at an estimated cost of \$250,000.

Roley Accepts S. A. Job

Rolf Roley, who will finish his work for the degree in Mining at the end of the present semester, has accepted a position as junior engineer at the Berlin Mine at Antiochia, Columbia, South America. Rolf will leave here for South America about February 1. Mrs. Roley will join him at a later date.

Meet Ed Kromka 1941 Football Captain Elect

Ed Kromka, Captain-elect of the 1941 Miner team said in a short interview last night that with the experienced Miner squad which we will have next year as well as some men to fill the vacancies left by the graduating seniors, we will make the

Ed Kromka Miners strong contenders for the MIAA championship."

Ed hails from the fair city of Boonton, New Jersey where he played three years of high school ball in the local secondary school. His versatility is displayed by the fact that on that team he played end, then guard and wound up in the tackle slot.

Since his enrollment at MSM he has played one year in the guard position and for the past two years has held down the regular tackle berth.

Kromka spends his summers working for the Wright Aeronautical Company at Patterson, New Jersey, putting spare time into hunting and fishing.

Intramural boxing, swimming, and basketball occupy no little of Ed's time as well as Theta Tau, and the AIME. Our new football captain was fortunate in reaching his majority two weeks after registration for Selective Service.

Free Show After Cap Burning Tonight

The Freshmen of MSM will be permitted to burn their hated green caps tonight at 10:45 on Pine Street at the postoffice corner. After the ceremony the entire student body will be the guests of the Rollamo Theater for a free show for a nickel.

As a MINER Sees it

We are glad to see that the Student Council, or at least a Mr. Hacker, reads this column and took the trouble to write a bit of a letter. He stated in this letter that the Student Council started a petition six weeks ago but because some bad Miners signed phoney names the petition was discarded and another started. It's not what we question the veracity of the statement, but just where have they been keeping the petition? If there is such a petition why not publicize the fact and put it in a public place.

And perhaps Mr. Fick and Mr. Hacker would like to read the following quotation from The MISSOURI MINER, Vol. 26, No. 30, May 1, 1940 concerning their meeting of April 25, 1940: "Plans were made for acting on Fred Waring's position of writing a school song, proving enough enthusiasm is shown by the students."

Well, Mr. Hacker, what has happened from April 25, until six weeks ago when the first petition was started? . . . We think the solution of the whole affair is to give the thing to a more progressive organization, the coeds, for example.

It's too bad the CAA boys have to have their beer busts so far away from Rolla just to keep the sponsor from hearing about it. It's a shame they can't hold any affairs with the blessing of the local administration.

Not too long ago the Varsity Orchestra held practice at the Pennant Tavern. Taking advantage of the situation the K. A.'s held a small drop-in there also. Both girls, incidentally, pronounced the K. A. Christmas Formal a success.

The Sigma Pi's and the Pi K. A.'s both held their dances over the week-end. On Friday night the lone crasher was Mazzoni. It would seem that a junior, and a fraternity man, would show better taste than he did at that affair.

What happened to all these petitions to the St. Pat's Board? Of course there might have been something in the MINER about it but we don't read the thing. Anyway we are thinking very seriously, after looking over the last few reigning queens, to start a petition to change from "Queen of Love and Beauty" to merely "Queen of Love." This, at least, would fit the situation better and perhaps someday we could also petition to remove the "Love" angle.

We hear that E. E. Hamman, lover extraordinary, is having a bit of trouble with several Stephens' girls, as are several other Pi K. A. boys. Seems as though the ladies from Columbia are worried about the Rolla boys.

Shooting "The Making And Shaping Of Steel"

A specially built screen protects the cameraman and his equipment as the "eye" of the camera peers into the "eye" of the open hearth to make a scene for "The Making and Shaping of Steel," a sound picture which will be shown at the Parker Hall auditorium Wednesday evening at 7:30.

You Know 'Em Too

By S. Rimel

This week we focus the spotlight on Allan Summers, a senior mechanic who was awarded the A. P. Green scholarship for having been the outstanding junior of his class. This statement alone, should be enough in describing the enviable record Allan has made at M. S. M.

Allan Summers was born in Opdyke, Illinois, and obtained his grammar and high school education at Gideon, Missouri. His home town is Tallapoosa, which is located in "Swampast" Missouri. The serious attitude and determination that Allan takes toward his school work and outside activities is the result of an intimate contact with the business world during the lapse of six years between his graduation from high school in 1931 and entrance to M. S. M. in 1937. He attended business school in Quincy, Illinois, for one year and was the honor graduate of his class in 1933. His desire to be an engineer, in spite of his inability to attend college, led him to procure a job as a stenographer for 2 years with the A. P. Green Fire Brick Company.

During his first year at M. S. M., Allan was a charter member of the Shamrock Club and Glider Club, received a Phi Kappa Phi book plate award, and obtained a job as student assistant in the Physics Department. During his second and third year he joined A. S. M. E., was elected to Tau Beta Pi, president of the Glider Club, and took the primary CAA flying course. The following summer he took the advanced C. A. A. flying course at Lambert Field, St. Louis. During his fourth year he was pledged to Phi Kappa Phi, a national honorary society. That he is respected and well-liked by his classmates in the mechanical engineering department was shown by his election to presidency of the A. S. M. E. flying is Allan's favorite hobby, but he has devoted most of his spare time to the Baptist Student Union of Rolla. He has traveled over 10,000 miles to attend the conventions and meetings in various parts of the country.

One of Allan's greatest merits lies, not in the successfulness of

Engineers Club to Take In New Members

Announcement was made today by Art Rose, Secretary of the Engineers Club, that the club will take in new members after the holidays. All those interested in joining this organization may secure application blanks from Art, and are urged to do so before leaving for the holidays.

Careful There

Lady (in grocery): "Is that the head cheese over there?"
Salesman: "No ma'am, that's one of his assistants."—Every Week Magazine.

his school career, but in the fact that he has worked his way through college. His chief ambition after graduation is to obtain a job in the designing or production field of mechanical engineering, preferably in the aircraft industry.
